**Comments:**

- Test results pertain to the specimen submitted. All results are dependent on the quality of the sample received by the laboratory.
- Negative test results do not rule out the possibility of current or future infection of COVID-19/SARS-CoV-2.
- Presence of inhibitors, mutations and insufficient RNA can influence the result.
- Kindly correlate with the referring physician for follow-up and repeat the test if necessary.
- Lower respiratory sample is recommended in severe or progressive disease.
- In case of inconclusive/presumptive positive result, repeat samples within 72 to 96 hours of initial sample with clinical correlation.
- In case of positive result, contact the health authorities and follow home isolation instructions.
- SARS-CoV-2 RT PCR test has been conducted with kits approved by the DHA.
- SARS-CoV-2 RT PCR is an invitro qualitative PCR assay for the detection of SARS-CoV-2 virus in respiratory systems
